

***With more than 6,000 players to date, DDBrix is recognised worldwide as the best way to discover DDMP, fully integrating it into in your organisation... with Lego bricks!***

**DDERIE®**

**FACTORY**

## Discover DDMRP with the

In this simulation, you witness a marked improvement of your **plant's performance** by **accelerating material flow** and increasing the **accuracy of the information flow** with DDMRP buffers. The **Lean approach** will allow you to experience **demand-driven planning and visible and collaborative execution.**

### For:

- Supply Chain professionals.
- Operational excellence professionals, production managers, purchasing managers, IT managers, financial managers, HR managers, sales managers.
- Consultants, students.
- DDMRP project team, stakeholders in a DDMRP project.

### Pre-requisites:

None.

### Objectives:

Learn basic principles of Supply Chain Management and DDMRP **while having fun.**

Experience **the changes** that DDMRP will bring to your information and material flow management.

Experience the new organisation proposed by DDMRP on **planning** and **priorisation of production orders.**

Discover how DDMRP allows you to **stabilise** production and **reduce** team stress.

Schedule a day to customise the workshop: increase the impact of the workshop by integrating **your constraints, your vocabulary and your environment**

### Options:

This workshop also exists in a distribution version.

## Program:

Using the DDBrix Factory kit, participants experience the 4 phases of the DDBrix Factory serious game in teams.

### Acceleration of the physical flow

1

Supply Chain with push flow

2

Supply Chain with Lean Flow

### Increasing the relevance of the information flow:

3

Forecast-driven supply chain

4

Demand-driven supply chain  
Modification of the planning and execution of production orders

### Theory

Know the basic principles of DDMRP

**Learning approach:**  
practical evaluation  
with simulation in real conditions

## Debriefing & perspective

During debriefing sessions led by DDMRP experts, all changes in planning (what to order) and execution (how to prioritise orders) will be discussed in more details.

### Details

- Lunch provided if the event is organised by b2wise.
- Payment on receipt of invoice.
- Booking effective after receipt of order.
- Cancellation with less than 10 days notice: 50% of the service fee required.

### Conditions

Between 8 and 16 people

1 day

Ask for a quote

Face to face, online, in house

French, English, Spanish, Portuguese

**COVERALL<sup>®</sup>**

**DISTRIBUTION**

You will simulate **the management of an end-to-end supply chain**, with a supplier, a factory, a hub and 3 shops. How can we **satisfy our customers** when we have a shortage of finished products, with a capacity constraint in production? How can we **minimise transportation costs?**

**DD BRIX**  
DISTRIBUTION

## Discover DDMRP with the

### For:

- Supply Chain professionals,
- Operational excellence professionals, management & distribution managers, logisticians, warehouse and store managers, purchasing, IT, CFO, HR, SD,
- Consultants, students
- DDMRP project team, stakeholders in a DDMRP project.

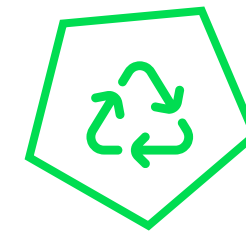

### Options:

- This workshop also exists in a Factory version.
- Additional 1/2 day: ask for a quote for the setting day
- Beergame workshop to discover the whiplash effect and how to eradicate it by setting up buffers

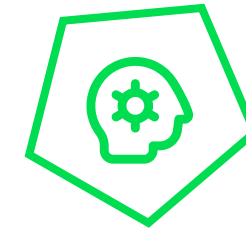

### Objectives:

Have an overview of the importance of flow and the links between customer demands, distribution network and suppliers.

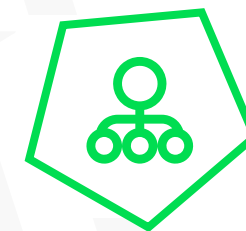

Experience **the changes** that DDMRP will bring to your informational and material flow management.

Experience the new organisation proposed by DDMRP on **the management** of a distribution system subject to the VUCA world.

Learn some fundamental principles of Supply Chain Management and DDMRP while having fun.

**Manage a distribution network under constraints:** limited production capacity, full truck loads, inconsistent lead times

**Pre-requisites:** None.

## Program:

In teams and using the DDBrix kit, participants experiment with the 2 phases of the serious game DDBrix Distribution.

### Acceleration of the physical flow

### Increasing the relevance of the information flow:

Distribution management with a classic supply chain

Distribution management with a demand-driven supply chain

## Theory

Know the basic principles of DDMRP

**Learning approach:**  
practical evaluation  
with simulation in real conditions

## Debriefing & perspective

During the debriefing sessions led by DDMRP experts, all changes in planning (what to order) and execution (how to prioritise orders) will be discussed in more detail.
